

Gamma School

Transforming under-resourced schools through structured digital education systems, teacher enablement, and future-skills programmes.

NPO 333-172-NPO | Registered 22 October 2025

Organisational Overview

Mission

Gamma School exists to transform under-resourced South African schools through structured digital learning systems, teacher enablement, and future-skills programmes.

Regions

KwaZulu-Natal-led, with a growing national footprint. We support schools in rural and township communities where digital access and teacher training are most needed.

Scale

150+ schools supported | 10,000+ learners reached annually | Structured implementation across KwaZulu-Natal

Implementation Model

Assess → Deploy → Enable → Support → Measure

We are a systems implementer. Our process is structured, measurable, and aligned to partner milestones. Sustainable change requires implementation, not one-off interventions.

Programmes — Four Pillars

1. **Digital Learning Platforms (Moodle)** — Deploy and maintain LMS in under-resourced schools
2. **Teacher Enablement** — Workshops and adoption support
3. **AI & Digital Fluency** — Future-skills programmes
4. **School Sustainability Infrastructure** — Where required

Case Snapshot

Regina Primary - Structured Adoption Model

- Full platform rollout
- Teacher onboarding workshop
- Ongoing support
- 100% educator sign-up rate

Partnership Models

CSI (Corporate Social Investment)

We help corporates deploy measurable, scalable digital education interventions aligned to CSI and ESG mandates. Programme sponsorship enables licensing, hosting, technical support, and educator enablement.

Government & Education Departments

We support structured digital rollout, educator enablement, and sustainable adoption within public school systems. Defined deliverables and reporting milestones.

ESG / Digital Skills

We implement future-skills programmes that equip learners for a digital and AI-driven economy. Implementation sponsorship for cohorts and workshops.

What Corporate Partners Receive

- Structured implementation plan
- Defined deliverables
- Measurable impact metrics
- Reporting milestones
- Visibility where appropriate
